STUCCO FLOOR REPAIR KIT

DESCRIPTION

STUCCO ITAL-STAIN is a mixture containing chemicals which react with lime, to stain concrete and cement surfaces.

PURPOSE

STUCCO ITAL-STAIN permanently stains and colour concrete and cement surfaces.

APPLICATION

Preparation

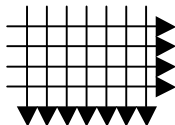

Surfaces should be firm and free from loose material, mould, oil and grease and should not have been painted previously.

Application

Apply with a paintbrush or paint roller, spreading the stainer uniformly across the surface, using the 'grid' method.

A second coat of STUCCO ITAL-STAIN can be applied if staining is not effective.

Leave the process to react overnight.

If staining has not be completed the next day, leave to react for another day before applying a layer of STUCCO COLOUR FASTENER and two layers of STUCCO FLOOR SEALER or STUCCO EPOXY FLOOR SEALER (see relevant data sheets).

COVERAGE

STUCCO ITAL-STAIN covers 20m² per litre (one coat), depending on the porosity and texture of the surface.

WARNING

Do not ingest. Keep away from children and pets.

PRECAUTIONS

Wear rubber gloves. In the event of contact with eyes or skin, rinse thoroughly with cold water. If irritation or discomfort occurs, seek medical help.
